A NEW LEVEL OF **FIRE AND COMFORT**

Napoleon® - Modernizing traditional wood burning technology

The S1, S4 & S9 are part of Napoleon's new contemporary EPA approved wood burning stove series and come complete with a modern cast iron door and pedestal base in a metallic charcoal finish. The stoves feature a cabinet like "easy glide" ash drawer with a removable ash pan and lid for easy cleaning. The S-Series also feature a "secure lock" lever action door handle (with a removable handle shield) that remains in a convenient open position when the door is open, making refueling safe and easy. The S-Series is the perfect wood burning stove for those wanting wood burning technology with a clean, contemporary look.

Vortex® Combustion System

Hidden Door Hinges

WHISPER QUIET® Heat Circulating Blower System

NEW AND INNOVATIVE WOOD BURNING TECHNOLOGY

Vortex™ Baffle & Combustion System

Napoleon's Vortex™ ceramic fibre baffle system super heats the firebox and increases the overall efficiency by extracting added energy from the flue gases before allowing them to exit the combustion chamber, a significant feat that typical wood appliances fail to accomplish. This achievement referred to as "secondary combustion" translates to fewer trips to the wood pile and a cleaner, hotter fire!

Removable Stainless Steel Secondary Air Manifold

The secondary air manifold produces horizontal jets of super heated secondary air that are mixed with the fire's smoke to burn off any smoke particles. For reliable long life operation the manifold is constructed of durable stainless steel and removable.

5/16" Firebox Top

The S-Series feature a heavy duty 5/16" firebox top.

Hidden Door Hinges

Hidden door hinges add to the clean, contemporary look.

"Secure Lock" Lever Action Handle

"Secure lock" lever action door handle remains in a convenient up position while re-loading fuel for added convenience.

Removable Handle Sleeve

The handle sleeve can be removed while unit is operating to ensure the handle is never too hot to touch. A convenient holder for the handle sleeve is located in the "easy glide" ash drawer.

"Easy Glide" Ash Drawer & Removable Ash Pan

Precision "easy glide" ash drawer with removable ash pan complete with lid for convenient and easy disposal. The ash pan fits into the ash drawer for added convenience and is hidden from view.

Metallic Charcoal Finish

The S-Series features Napoleon's new contemporary metallic charcoal finish.

Accent Trim

Optional door accent trim available in satin chrome plated finish adds to the clean, contemporary look.

WHISPER QUIET™ Heat Circulating Blower System

When you want to extract the maximum amount of heat, an optional heat circulating variable speed blower offers increased heating efficiency with a sensor control automatically turning the blower on and off.

Eco-Friendly EPA Technology

Heating your home with a Napoleon® S-Series EPA approved wood burning stove uses renewable resources that release no more carbon dioxide than a decomposing tree would lying on the forest floor. In fact, when the entire carbon cycle is considered, a Napoleon® EPA approved stove heats your home more efficiently and with less impact on the environment than any other heating fuel option.

Ready for Installation

The S-Series comes complete and ready for installation. Pedestal design only. Pedestal, door and door handle included.
